SUMMARY

Computer Science student and founder of HAVEN, a community management platform with a mobile app, admin dashboard and integrated payments. I build products from start to finish, combining full stack development with product design and UX informed by a background in psychology. Interested in software engineering roles that pair technical problem solving with thoughtful product development.

SKILLS

- **Programming:** TypeScript, JavaScript, Python, C++, SQL, R, HTML/CSS
- **Tools:** React, React Native, Expo, Supabase, PostgreSQL, Stripe, Figma, GitHub, Resend
- **UX and Product:** UX/UI Design, Wireframing, Prototyping, User Flows, Information Architecture
- **Languages:** English, Spanish

EXPERIENCE

HAVEN | havencommunity.app | Founder and Developer | 2024 to Present

- Designed and built a multi platform product for HOAs, clubs and residential communities: an iOS and Android app (Expo, React Native), a React admin dashboard, an Astro marketing site and hosted payment pages, sharing one TypeScript core package.
- Architected the Supabase backend: PostgreSQL with role based access, 140+ versioned migrations, and 27 Edge Functions for billing, refunds, notifications and invitations.
- Built payments on Stripe Connect for household dues, facility bookings, event tickets and guest passes, with itemized fees, automatic refunds, retries and webhook reconciliation.
- Shipped member and admin workflows: households and roles, bookings with timed holds, recurring events with waitlists, announcements, documents, and QR guest passes sent by branded email.
- Owned the product end to end: research, Figma design, pricing and subscription tiers, automated testing, and deployment on Vercel.
- **Tech**: TypeScript, React, React Native, Expo, Supabase, PostgreSQL, Stripe, Astro

The-Versus | AI Agent Automation | Independent Project

- Built a human in the loop AI agent with OpenClaw that proposed daily comparisons and article ideas over Telegram, publishing only after approval, and turned opinions into finished articles through iterative drafting.

Operations and Technology Intern | Banco Venezolano de Crédito | Caracas, Venezuela | 2022

- Rotated across operational, technology, and client teams within a financial institution.
- Gained exposure to internal systems, security processes, and real operational workflows.

Digital Product Design Consultant | Freelance | 2025

- Designed presentations and digital materials for healthcare and medical professionals.
- Collaborated with clients to turn complex information into clear visual narratives.

EDUCATION

- **University of Florida** | Bachelor of Science in Computer Science | Expected May 2027
- **Flatiron School** | Certificate in Digital Product Design (UX UI), 2023
- **Jacksonville University** | Undergraduate Coursework in Psychology
